

Please don't take my traffic and weather station from my xm satellite!!! I work in Baltimore and believe me, the traffic and weather coverage is few and far between at the times I go to work and come home (6am and 7pm). I travel 37 miles to work. I am a nurse and it's very important to get to work on time. I'm sure you are aware of the heavy traffic on 70 and 695, and how incidents constantly happen on the routes into Baltimore. I can't tell you how many times I've had to find a different route to get to work in downtown Baltimore. Last winter was the absolute worst weather I've ever had to drive through. Every week it was a different kind of storm, including a freak ice storm where I sat on the ramp to 70 for an hour! Having xm would have saved me a lot of time and anxiety. Believe me, there was no warning on the radio of that storm or the traffic problems before I got stuck in it. I got home after 9:30, and had to get up the next morning and get to work by 7am and had no good idea of the traffic conditions then either. There were still cars sliding all over the place the next morning!

In my opinion, Baltimore radio does an extremely poor job of covering traffic and weather. Xm fills a very vital roll for me. Plus I'm paying for it!!!! I should have the right to better service!!!

Thank you,
Carol Summers
